SECTION D

(10x2=20)

Answer any two questions:

31. Read the following passage carefully and answer the questions that follow: (2x5=10)

We must do all we can to stop conflicts and civil war. Most conflicts happen in poor countries, especially which are badly governed or where power and wealth are not distributed fairly between

different tribal or religious groups. So the best way to check fighting is to make a political arrangement in which all groups have their representatives. The need is to ensure human rights and economic development of all. The next fundamental freedom is one that is not mentioned in the UN charter. In 1945, the leaders could not imagine that such a situation would arise. That is the freedom of future generations to live on this planet. Even now many of us have not understood its importance. We are using up the limited resources for our present use. We are over using and even wasting them. We are, in fact, robbing our children of their right to live. We must preserve our forests, fisheries and wildlife. All of these are collapsing because of our own habit of consuming or destroying them.

- a) Why do most conflicts happen in poor countries?
- b) What is the best way to check conflicts?
- c) What is meant by 'the freedom of future generations to live'?
- d) How are we robbing our children of their basic right?
- e) What must we preserve for our children?

32. Read the following passage carefully and answer the questions that follow: (2x5=10)

Technology has become an inseparable part of human life. From the moment we wake up to the time we sleep, we are surrounded by gadgets and digital devices. While technology has undoubtedly made our lives more convenient, it has also raised concerns about our dependence on it. Children today spend more time on screens than on outdoor activities. This has led to reduced physical exercise and a decline in face-to-face social interactions. Yet, technology is not entirely harmful. It offers access to information, simplifies communication, and supports education through online platforms. During the pandemic, students continued their studies from home using smartphones and computers. The challenge lies in maintaining a balance between the use of technology and real-life experiences. Parents and teachers play a crucial role in guiding young minds towards responsible use of digital media.

- a) What makes technology an inseparable part of human life?
- b) Mention two negative effects of increased screen time on children.
- c) How did technology help students during the pandemic?
- d) What role do parents and teachers play according to the passage?
- e) Find words from the passage that mean the same as:
a) essential b) proper use

33. Write the summary of the poem 'Amanda'.

34. Horace Danby was a meticulous planner but still he faltered. Where did he go wrong and why?

**CENTRAL INSTITUTE OF HIMALAYAN CULTURE STUDIES
HALF YEARLY/ QUALIFYING EXAMINATION 2025 - 2026**
SUBJECT- SCIENCE
PAPER NO.: 7th
PURVA MADHYAMA 2nd YEAR

SECTION-A (2x10=20)

Pass Marks: 33

SECTION-A (2x10=20)

Answer the all questions.

1. What is photosynthesis?
2. Define linear magnification?
3. What is magnetic field?
4. What is decomposition reaction?
5. Write the full form of RBC and WBC.
6. Define nutrition.
7. What is difference between aerobic and anaerobic respirations?
8. What are exothermic and endothermic reactions with one example in each?
9. Define Combination reaction.
10. What is chemical name of common salt?

SECTION-B (3X10=30)

Answer any ten of the following questions.

11. Define compound and give two examples of compound.
12. What is amphoteric reaction?
13. Which non metal conducts heat and electricity?
14. Name the metal which is in the liquid form.
15. Define ores.
16. What is an alloy?
17. Which metal is the most reactive and the least reactive?
18. Name the largest and the smallest arteries.
19. What is sound of heart?
20. Define platelets.
21. Name the largest and the smallest vein.
22. What is speed of light in vacuum?

SECTION-C (5X6=30)

Answer any six from following questions.

23. Write the characteristics of chemical reaction.
24. Define refraction of light. State laws of refraction of light with proper diagram.
25. Write short notes on Xylem and Phloem tissues.
26. Define electric current and write its unit. State ohms law.
27. Write physical properties of metal and non metal
28. What are chemical name and formulae of plaster of paris, washing soda, baking soda and bleaching powder.
29. What are uses of plaster of paris, washing soda, baking soda and bleaching powder?
30. Write properties of acid and base.

SECTION-D (10X2=20)

Answer any two of the following questions.

31. What is reflection of light? State laws of reflection of light with appropriate diagram.
32. Define reactivity series of metal and prepare table for metals with their decreasing order of reactivity.
33. Define excretion. Draw neat and clean diagram of human excretory system.
34. What are ores of the metals aluminum, iron, magnesium, mercury, copper and zinc.
